

THOMAS JAMES

Kasaragod, Kerala - 670511 | +91 9074920960 | mrpanthammavan@gmail.com | linkedin.com/in/thomas-james-panthammakkal-1335952a4

PROFESSIONAL SUMMARY

Motivated Computer Science & Engineering professional with hands-on expertise in cybersecurity, network protocols, full-stack web development, and algorithm optimization. Proven track record in developing secure blockchain platforms and patent-pending route optimization algorithms. Strong problem-solving aptitude with demonstrated experience in UI/UX design and technical troubleshooting.

TECHNICAL SKILLS

Programming Languages:	Python, C, C++, Java, JavaScript (Node.js), SQL, HTML/CSS
Security & Networking:	TCP/IP, DNS, Ports & Protocols, Kali Linux, Nmap, Metasploit, CTF Challenges, Incident Response, Social Engineering
Tools & Frameworks:	Node.js, Git/GitHub, Docker/DevOps, Figma, Adobe XD, Manual Testing
Core Concepts:	Data Structures & Algorithms, Computer Hardware, Blockchain Fundamentals, UI/UX Design

TECHNICAL PROJECTS

Courier Route Optimization System (Patent Pending) Dijkstra, Google Maps API, Python

- Architected an intelligent routing platform leveraging **Dijkstra's Algorithm** and **Google Maps API** to evaluate real-time traffic, delivery cost, and road conditions.
- Optimized multi-stop dispatching schedules, resulting in reduced simulated fuel consumption and shorter route turnaround times.
- Published innovative delivery logistics methodology in the Official Patent Journal (Patent Pending).

Campus Voting System Jun 2025 – Jul 2025 | Kochi, India

Blockchain, Web & Security Technologies

- Engineered a tamper-proof web platform for university elections integrating digital voting and blockchain-based result verification.
- Designed secure voting workflows ensuring voter anonymity while maintaining full auditability across distributed nodes.
- Built responsive frontend interfaces and backend verification APIs to ensure seamless multi-user engagement.

PROFESSIONAL EXPERIENCE

UI/UX Design Intern Pace Lab

- Designed intuitive, user-friendly web interfaces and interactive application wireframes using **Figma** and **Adobe XD**.
- Applied modern UI/UX principles to streamline user journeys and improve visual hierarchy across client web platforms.
- Collaborated with development teams to iterate on prototypes based on usability feedback and design guidelines.

EDUCATION

B.Tech in Computer Science and Engineering Expected Graduation: Jul 2026 Vimal Jyothi Engineering College Chemperi, Kerala

CERTIFICATIONS & LANGUAGES

Certifications:	Cyber Security Certification – Offenso Hackers Academy
Languages:	English (Professional), Malayalam (Native), Hindi (Conversational)
